

Reporter Reporter

**Thermographic software
with the right stuff**

Reporter is a thermal image analysis program,
with the basic tools.

Make quality reports from images taken from a
thermal imager.

LITE

Software features

Frame Grabbers supported

- PCMCIA frame grabber for Laptops
- PCI color frame grabber for desktop computers.
- Capture and freeze live images with a RIGHT MOUSE BUTTON CLICK.
- Fire Wire connections - **Note planned implementation.**

Easy Report Mode.

- Capture thermal and visual images for reporting with ONE MOUSE CLICK.
- Link graphs, images and DV data to a report with automatic linking.
- Make reports from templates with easy placement with grids and snap to grids for text, and DV value information.
- Fill in report mode with colored boxes.
- Batch print reports.

Image Editor

- Measure DV (digital values) with point, line, shape, circle, and rectangle. .
- Annotate mini graphs on an image.
- Send Digital Values from a LINE DV tool to GRAPHS.

Image Enhancement

- Colorize images with included palettes in 256 colors.
- Make new palettes with palette editor.

Easy to use software

- Customize software operations with preference.
- Online GETTING STARTED help with sample images, reports, palettes, labels, and pointers.
- Illustrated manual.
- ImageMaster support allows easy report making by capturing thermal, visual, and audio information.
- CLIPBOARD support.
- Cut and paste into other word processing applications.

Editing

- Change and reposition any objects - DV measurements, annotations, color bars, etc, easily and quickly.
- Stick and hold. Reloading an image does not erase previous DV tool applications so they can be reused and repositioned.
- UNDO, REDO.
- Sample template, and images are included for easy software startup.

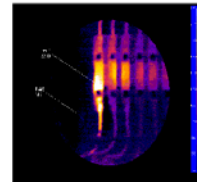

Upgrades

- Free software upgrades from website.
